

**Specification Amendments**

Please amend the paragraph of page 8, lines 6-19 of the text as follows:

-- A core-shell particle ~~with all of~~ having the presently claimed features ~~of Claim 1 of the present Patent~~ achieves these objects, and also achieves other objects which, although not explicitly mentioned, are readily derivable or producible from the circumstances discussed in the above introduction. ~~Advantageous modifications of the core-shell particle of the invention are protected in the subclaims dependent on Claim 1.~~ The process claim protects a preferred mode of preparation of the core-shell particle of the invention. Also claimed are impact-modified poly(meth)acrylate moulding compositions which comprise core-shell particles of the invention, and preferred application sectors for these moulding compositions. --
